

Visitor Verification Checklist

Residential contractor and auditor impersonation

ANALYST SUMMARY

A uniform, badge, scanner, or accurate description of a local service problem does not independently establish a visitor's identity or authority.

VERIFICATION PATH // DO NOT SKIP STEPS

1

Keep the barrier closed

Request a name, organization, and work-order number.

2

Find an independent contact

Use a trusted public record, not information supplied at the door.

3

Confirm both records

A known dispatcher must verify the visitor and exact service order.

4

Refuse unconfirmed access

Do not surrender credentials, tokens, fobs, or resident information.

5

Record the outcome

Preserve original footage and the claimed details offline.

IF THE VISITOR LEAVES

Leaving after verification is requested does not prove criminal intent. It does end the immediate access request.

PRESERVE

- Arrival time and clothing
- Vehicle and claimed organization
- Unmodified hallway footage

DISCLOSURE LIMIT

This checklist is general public guidance. It does not establish representation, prove criminal intent, or guarantee an individual response.
